

| MULTI FUNCTIONAL TOXIN BINDER

Developed to meet the vitamin and mineral needs of dairy livestock.

ADVANTAGES

- Provide the daily vitamin and mineral requirements of dairy livestock.
- Increases the appetite of animals with its odor and flavoring aroma.
- Mycotoxin metabolites may pass into the food chain through milk and eggs and threatening human health. Important for human health.
- Supports the immune system and connective tissue formation thanks to its trace elements.

Vitamix:

- Supports digestion, increases feed efficiency and increases milk and fattening performance with live yeast contents.
- When used regularly, VITALIC VITAMIX helps to regulate the rumen microflora.
- Supports the immune system and connective tissue formation with its trace elements and B group vitamins.

Vitamix Eco:

- Reduces the problems in animal performance against mycotoxin contaminations from feed or raw material origin with toxin binder contents.

APPLICATION

- Use by adding 10 kg to 1 ton of milk fattening feed.
- Dairy cows or beef livestock by adding 100 g to feed daily
- For sheep's and goats by adding 10-15 g to the Daily feed.
